

Are Physician's UPIN Numbers Required in the Healthcare Assistant?

Background:

There have been a number of questions arising regarding the requirement of entering a physician's UPIN number into the Healthcare Assistant application. The answer is **YES**, as it is required for billing purposes and shows up on the claim that is being submitted to the insurance company.

Typically, the physician is to furnish this number to the Home Health Agency, but in the case that the physician does not, below are three external links that are used to look up UPIN numbers of physicians.
